

Never click on click here or yes on a pop up, it will probably transfer viruses onto your computer.

If it is too good to be true, it probably is. Think about it, do you really think the government is giving you a \$70000 cheque for free?

Always click on the x and exit the pop up. Even before you click the yes, (which you would not do) the pop up could already be putting a virus onto your computer.

POP UPS
